

- DIGITAL infrared classroom system with excellent audio clarity
- Modern and user friendly design
- Personal mic - Hygiene

TAIDEN® TES-5600 Series **Digital Infrared Classroom Audio System**

In 2015, TAIDEN released this world's first DIGITAL infrared wireless classroom audio system.

Taiden TES-5600 series featuring built-in power amplifier can be used with existing speakers in the classroom to realize audio reinforcement.

Also, the wireless microphone for teacher can be used as a presentation remote to control slideshow.

The classrooms can be equipped with a TAIDEN e-lock charging station, so that the microphones can be securely stored and charged between class sessions and good to go for classes after.
